- Supported in IDM 1.0/NIM 1.0
- Supported in IDM 2.0
- Supported in IDM 2.0/NIM 1.0 Auto Update 10
- Supported in NIM 2.0
- Supported in IDM 3.0
- Not supported

- 1 Use of 802.1X is strongly recommended. However, IDM supports provisioning of attributes with any RADIUS-based authentication (MAC, Web, and 802.1X).
- 2 Location must be manually entered with PCM+ 2.1 (device is discovered under ProCurve Others).
- 3 Must use ANY port due to iTable discrepancies.
- 4 Supported on K.12.02 or greater
- 5 Supported on WA.02.00.0205 or greater
- 6 Supported on WS.01.01 or greater
- 7 Supported on K.12.31 or greater
- 8 Supported on K.13.xx or greater
- 9 Supported on K.13.19 or greater
- 10 Supported on K.13.xx or greater
- 11 Supported on K.14.xx or greater
- 12 Supported only with an external supported RADIUS server

Platform	RADIUS Server					
	Server 2003 (32-bit)	Server 2003 (64-bit)	Server 2008 (32-bit)	Server 2008 (64-bit)	ProCurve NAC 800	Red Hat Linux Ent 4.7, 5.2 SUSE Linux Ent 9.3, 10.2
MS Active Directory and Internet Authentication Service (IAS)						
MS Network Policy Server (NPS)						
FreeRADIUS						

User directory support

- IDM supports synchronization with Active Directory on Windows Server 2003 32-bit or 64-bit and Windows Server 2008 32-bit or 64-bit with Kerberos authentication.
- IDM supports user import with Active Directory, E-Directory, Open LDAP with Kerberos, External/Certificate, simple/anonymous, or Digest-MD5 authentication, with or without SSL.
- IDM supports LAD on ProCurve NAC 800.
