

Attention

Mini-GBIC Revision Requirement

This product requires revision “B” or later mini-GBICs or SFPs. (Product number ends with the letter “B” or later, for example J4858B, J4859C).

For available mini-GBICs or SFPs refer to the HP ProCurve Web site:

1. Go to www.hp.com/go/procurve.
2. Click on **Products**, then on **Switches**.
3. Select your switch product.
4. Click on the **Accessories tab** to find the list of supported mini-GBICs and SFPs

Third-Party Connectivity Accessories

HP ProCurve Networking designs and manufactures its products for use with genuine HP ProCurve connectivity accessories such as transceivers, mini-GBICs, and SFPs. Use of genuine products ensures that your network maintains optimal performance and reliability.

Third-party connectivity accessories, including any non-genuine products, are not supported and their use may result in product malfunction, or in degraded network performance and reliability. Customers who choose to purchase, install or use third-party or non-genuine HP ProCurve connectivity accessories do so at their own risk.

HP ProCurve Networking, at its discretion, may not provide support for networking problems resulting from the use of third-party transceivers, mini-GBICs, or SFPs. However, the warranty on the genuine HP ProCurve Networking product is not affected.

Should you require additional HP ProCurve connectivity accessories, please contact an HP ProCurve sales representative or an authorized reseller.
